### ABOUT

---

Experienced DevOps Engineer with a Bachelor's degree in Computer Engineering and 3+ years of hands-on experience in Linux server administration, Shell Scripting, and Docker. Proficient in Unix-based systems and Automation tools and familiar with various Databases. Currently gaining hands-on experience with Kubernetes, Python, and Monitoring Tools. I am eager to leverage my Linux proficiency and passion for mastering DevOps tools to drive continuous improvement and efficiency.

### SKILLS

---

DevOps, Kubernetes, Docker, Linux, Shell Scripting, CI/CD, Ansible, Zabbix, Grafana, Prometheus, VMWare ESXi, VMware vSphere, Git, Nginx, Redis, MySQL, Jenkins, Gitlab, Fortinet, Sentry, Sonarqube, Elasticsearch, Kibana

### EXPERIENCE

---

#### DevOps Team Lead

Mar 2022 - Present

##### Ariana Labs

Tehran

- Led a team of DevOps engineers to streamline CI/CD processes and reduce deployment time.
- Improved system reliability and reduced costs by designing efficient infrastructure.
- Implemented best practices for infrastructure management, enhancing deployment efficiency.
- Boosted collaboration between development and operations teams and accelerated project delivery.

#### DevOps Engineer

Aug 2022 - Present

##### Ariana Labs

Tehran

- Utilizing variable-based Helm charts and manifests for orchestration with Kubernetes.
- Implementing automation pipelines using Ansible, Jenkins, and GitLab EE premium edition.
- Monitoring and alerting in Kubernetes clusters and microservices with Zabbix, Prometheus, and Grafana.
- Resolving issues and providing problem-solving solutions for operating systems, servers, networks, and databases across three test stages during non-functional testing.
- Logging with the ELK stack, including practical indexing, and using Fluentd for efficient data collection.

#### Linux System Administrator

Mar 2021 - Aug 2022

##### Rechub Platform

Tehran

- Linux System Administrator responsible for the seamless maintenance of servers, ensuring optimal performance and reliability.
- Spearheading the creation and fine-tuning of CI/CD pipelines on Gitlab, streamlining development workflows and enhancing project efficiency.
- Proficiently developing and orchestrating automated server backups using Veeam Backup alongside custom Bash scripts, ensuring data integrity and disaster recovery readiness.
- Diligent Quality Assurance specialist conducting rigorous testing protocols and ensuring robustness, security, and compliance with industry standards.

### EDUCATION

---

#### Islamic Azad University

Feb 2023

Bachelor's degree, Computer Engineering
